SERVING LOUISIANA, TEXAS, ARKANSAS, & MISSISSIPPI

PROTECTING OUR FUTURE

Homeland Safety Systems (HSS) has been a leader in the design, installation, and service of video surveillance and access control systems across the Ark-La-Tex and MS for over 20 years.

Our company has rapidly grown with offices in Shreveport, Monroe, New Iberia, St. Rose and Marshall. We currently service over 2,000 facilities, some having in excess of 1,000 cameras county/parish-wide and all accessible from multiple locations.

We are the best at providing turn-key solutions to a small, but dedicated group of clients, who know that we will do what we say in a manner that exceeds their expectations every day. Our company has a solution tailored to every need and we pride ourselves on quick response, personal service, and NDAA/TAA compliant solutions.

We Are COMMITTED

With the knowledge and ability to make multiple security systems work together as one integrated solution, we stand committed to providing the finest and latest products in the industry.

We Stand For QUALITY

The only expectation that matters is that of our customers. Regarding our service, we will always strive to meet or exceed those expectations. Any committment we make will be honored, without exception.

We Custom-Design YOUR SOLUTION

As a complete system design center, we are capable of providing personalized security solutions for ANY need, on an individual basis.

We Are Available ANY DAY, ANY TIME

Our employees are available 24 hours a day, 7 days a week for the convenience of our customers.

YOUR PEACE OF MIND
CUSTOM-DESIGNED

With our extensive expertise in custom designing security systems, we possess a distinct advantage in servicing most of our equipment remotely, along with the ability to have a quick response time for on-site problem resolutions. Our expansive 18,000 square foot warehouse is stocked with a wide array of parts essential to our equipment, enabling swift and efficient repairs or replacements. Moreover, our technicians hold factory certifications, ensuring their proficiency in executing any required maintenance tasks.

**Service agreements are offered to cover the systems we design and install.

IF IT IS NOT DESIGNED BY HSS, ONLY THE MOST REPUTABLE LEADERS IN OUR INDUSTRY ARE REPRESENTED.

SAFETY SYSTEMS

PRODUCTS AND EQUIPMENT

SURVEILLANCE SYSTEMS

Our IP security cameras are vandal proof, weatherproof, and provide a superior level of infrared day and night visual clarity in your recorded video images. They are designed to prevent damage from hanging on, prying against, or being struck with an object. Our systems can integrate video analytic capabilities that enable your cameras to identify facial recognition, gunshot detection, object tracking, fire & smoke detection, and more.

ACCESS CONTROL

HSS provides professionally designed access control systems that give you the ability to track, record, and restrict access throughout your entire organization. We offer an advanced line of systems including card and keyfob readers, electric strikes, magnetic locks, biometric readers, intercom/door release, panic buttons, and more. These systems work well on their own but can be more beneficial when integrated with cameras and other electronic security equipment.

INTRUSION ALARMS

Our intrusion alarm systems combine a quality, user-friendly alarm panel with motion sensors placed at entryways and numerous points throughout your building. HSS can provide a completely customized solution including control panels, keypads, motion detectors, glass break detectors, sensors, alarm sounding devices, and more. These systems can also be integrated with surveillance cameras, access control systems, and other physical security solutions.

HALO SMART SENSORS

The award-winning HALO IOT Smart Sensor is a comprehensive, multi-purpose security solution for privacy areas not covered by traditional cameras. HALO is capable of vape detection, smoke detection, THC detection, and sound abnormalities such as gunshots, bullying, and fighting. This smart device can send emails, texts, and/or alerts to designated personnel during an attack or emergency at your facility.

METAL DETECTORS

HSS is partnered with Garrett Metal Detectors, an industry leader in metal detection and checkpoint screening devices. We have trained technicians with experience in the installation and service of Garrett's reliable products. We can also help to create a seamless, unified solution by integrating your metal detector with video surveillance and access control systems.

We offer handheld, walkthrough, and elevated body temperature screening metal detectors.

VEHICULAR GATE SYSTEMS

The Ramset series of slide gate operators are the most durable and reliable in the in designed for high traffic installations. We install, service, and design systems with full UL 325 compliance. All of our systems can be integrated with high speed vehicle identification systems, allowing auto-entry through the gate.

PRODUCTS AND EQUIPMENT

CUSTOM-DESIGNED & MANUFACTURED
ENTERPRISE CLASS SERVERS

Our HSS-VMS servers are meticulously constructed to ensure superior quality and a friendly ease of use for our end-users. Our VMS incorporates advanced video analytics that enable accurate monitoring and minimize the reliance on manual supervision. Prior to deployment, each machine undergoes rigorous testing, to ensure that once in the field they work flawlessly. If any problems do arise we are usually able to handle them within a day.

MONITOR VIEWING

- Up to 64 Channels
- H264, H265 GPU Decoding
- Fullscreen Viewing
- Noise Tolerance for Motion Detection
- Object Counting / Object Tracking
- Facial Detection
- Multi-Monitor Display for Live View & Playback
- Smart Dual Stream for Monitoring & Recording
- Support for Microsoft SQL & Access Data Types
- Panel Resolution Up to 4K
- 3D E-Map
- Multi-Level Passwords Protection
- Embedded I/O Devices Control
- Embedded PTZ Control Panel
- System Idle Protection
- Customizable Layout for Live View & Playback

RECORDING, SEARCH, & PLAYBACK

- Real-Time Recording
- Recording Runs on Round-The-Clock Motion Detection, Alarm, & Schedule
- Adjustable Recording Quality & Frame Rate for Each Camera
- Pre-Motion & Post-Motion Recording
- Storyline Recording
- Bookmarking Video Events
- Object Search
- Timeline Search
- Thumbnail Browsing to Quickly Search for Specific Frames Within Footage
- Support for Recording in Standard H.264, H.265, & MJPEG Codec

NOTIFICATIONS

- Email Notifications with Video Images Attached
- Video Lost Detection & Notifications
- Camera Popup Upon Motion or I/R Trigger
- SMS Alerts / Directs PTZ to a Preset Location

WEBCAM & REMOTE PLAYBACK

- Single View & Multi-View
- SSL Encrypt Connection Support
- UPnP Compatible
- 32 Channels of Remote Playback
- Two-Way Audio Communication
- Remote E-Map with Popup Live Images Upon Input Trigger
- Remote Access to Video & Audio Files
- Video Archive by Date/Time/Cameras
- Advanced Search Function
- Support for PIP, Focus View, Defogging Live Videos, & Video Stabilizer in Single View

ADVANCED I/O CONTROL

- Video Recording, Email Notifications, & Output Device Trigger Upon Input Trigger
- Advanced Search Function
- Remote Control of PTZ Domes & I/O Devices

IT TECHNOLOGY

- RSA Network Security
- Authentication Server
- SSL Security Network

SERVICES AND SPECIALTIES

DESIGN & PLANNING

Whether you need to upgrade an existing security system, design a system for new construction, or plan the implementation of a multi-facility enterprise-level system, our design experts can ensure that your facility is ready to meet a multitude of security challenges. Our risk assessments serve as the basis for our recommendations and ultimately result in a security system design that will address your unique requirements.

SYSTEMS INTEGRATION

As a premier system integrator in the security industry, our team of engineers from various backgrounds has the knowledge and experience to make multiple different systems work together as one unified solution. The integration of physical security, such as access control, into a CCTV camera and alarm system allows you to manage all your systems from one interface, giving your facility an extra layer of security with reduced costs to manage.

CLASSROOM ENHANCEMENTS

Classroom Enhancement Solutions is a comprehensive technology deployment designed to maintain a safe and efficient atmosphere in the classroom. This involves the implementation of audio and video recordings that allow for prompt evaluation of students and teachers while encouraging them to remain accountable for their actions. It can also provide undeniable evidence for administrators to take action against bullying and negative interactions.

JAIL LOCKING & CONTROLS

Our engineers have extensive experience in the design and installation of locking devices and electronic control systems for jails, prisons, and detention facilities of all sizes. Our user-friendly control systems can be integrated with video surveillance to automatically display specified cameras when intercom buttons are touched on the graphic display. They can also be integrated with your current communications systems, security systems, and utilities for comprehensive control.

INTERESTED IN A
FREE RISK ASSESSMENT?

We are committed to partnering with facilities across Louisiana, Texas, Arkansas, and Mississippi to highlight some of the unrecognizable yet potential dangers and risks that can occur at any given time.

OUR EXTENSIVE ASSESSMENTS INCLUDE:

DETAILED WALKTHROUGH & EVALUATION OF FACILITY INDOOR & OUTDOOR

- Facility Location
- Daily Operations
- Signage
- Surrounding Businesses
- Current Access/ Surveillance Systems
- Parking Lots, Perimeters, and Fencing
- Crime Rate in Surrounding Area
- Distance to Emergency Services

EVALUATE UNDERLYING FEATURES TO DETERMINE AREA'S RISK LEVEL

- Minor
- Moderate
- High-Risk

ISSUE A DETAILED MAP OF YOUR FACILITY

- Pin-Pointed Locations with Deficiencies
- Danger Areas to be Immediately Addressed
- Recommended Security Measures
